

Label Anything:

100% Salesforce Native Application for creating and printing barcode labels from any SFDC object.

The Ascent Solutions team has designed the Label Anything app to create and print labels, barcode labels, and encode RFID tags directly from any SFDC standard, custom or managed package objects.

What Is It?

- Barcode labels and encode tags from any standard, custom or managed package objects

- Build your labels with ZebraDesigner™ software, add that template to SFDC & print directly out of Salesforce

- Save barcode templates in your Salesforce instance

- Any size label with any barcode symbology. 3 of 9, 128, UPC, EAN, PDF, Datamatrix, and QR codes

Who Can Use It?

Anyone on Salesforce who has a need to create and print labels for any of the following applications

- Fulfillment by Amazon

- Identification

- Inventory Control

- Vial and Tube Labeling

- Retail (UPC & EAN labels)

- Shelf Labeling

Some Industries We Serve

- Healthcare
